

WHITEPAPER v1

INTRODUCTION TO GUARDIANS OF AMAZONIA

In an era where cryptocurrency trends and environmental crises intersect, the need to harness technological advancements for the betterment of our planet has never been more critical. Guardians of Amazonia (GOA) stands at this unique crossroads, blending the playful appeal of a meme coin with the profound mission of environmental conservation.

GOA is an innovative project that leverages the efficiency and robustness of the Base Network to create a sustainable, community-driven ecosystem dedicated to preserving the rich biodiversity of the Amazon rainforest. While the world is captivated by the rise of meme coins, GOA transcends mere novelty by embedding a vital purpose within its core.

Our project is more than just a cryptocurrency; it is a movement. GOA aspires to fill the gap between technological advancement and environmental stewardship, proving that a meme coin can carry significant weight and drive meaningful change. By combining blockchain technology with a deep commitment to conservation, GOA aims to foster a community united by the desire to protect one of the world's most critical ecosystems.

BASE NETWORK

GOA is built on the Base Network for its high performance, low transaction fees, and strong community support. Its robust infrastructure ensures a secure, scalable, and efficient platform for GOA's dApps and services, delivering a seamless user experience.

KEY BENEFITS:

High Efficiency

Fast transaction times and low fees.

Security

Strong security measures and a well-established ecosystem.

Interoperability

Easy integration with other blockchain services and platforms.

www.guardiansofamazonia.org

PURPOSE

The primary purpose of GOA is to champion the conservation of Amazonian biodiversity through a unique fusion of cryptocurrency, NFTs, and community engagement. GOA utilizes blockchain technology to provide a transparent, decentralized platform that directly supports environmental initiatives while offering value and engagement to the digital community.

As part of the GOA ecosystem, GOA Studios will develop gaming projects related to the transformation and conservation of the environment. These games will not only entertain but also educate players about the importance of environmental conservation, fostering a deeper connection between users and the Amazonian ecosystem.

MISSION

Our mission is to leverage the power of blockchain technology, decentralized finance (DeFi), and various other use cases within our ecosystem to support and promote the conservation of the Amazon's diverse flora and fauna. Through strategic partnerships, cutting-edge technology, and a committed community, GOA is dedicated to making a sustainable impact on the preservation of the Amazon rainforest.

ECOSYSTEM

ECOSYSTEM

Guardians of Amazonia (GOA) integrates a suite of robust utilities to ensure the ecosystem is both functional and supportive of its conservation mission. Here's a comprehensive look at our key utilities:

LIQUIDITY & TOKEN LOCKER

Secure dApp: Our decentralized application (dApp) for projects on Base Network locks liquidity securely. This mechanism ensures stability and builds trust within the ecosystem by guaranteeing that liquidity is maintained and cannot be easily removed, protecting investors and fostering a secure trading environment.

MULTISENDER DAPP

Token Distribution: Our MultiSender dApp enables users to distribute tokens to multiple wallets in a single transaction efficiently. This tool is essential for simplifying airdrops and promotional distributions, making it easy to engage and reward our community members.

www.guardiansofamazonia.org

GOASWAP

DEX Aggregator: GOASwap is a state-of-the-art decentralized exchange (DEX) aggregator developed in partnership with Sushi.com's V2 Protocol. It provides users with optimized pricing and secured liquidity, ensuring that transactions are both cost-effective and reliable.

CONTRACT DEPLOYER

Project Launch: The Contract Deployer simplifies the process of launching projects on Sushi's LP pools, integrated seamlessly into GOASwap. This utility lowers the entry barriers for new projects, providing them with easy access to liquidity pools and fostering innovation within the ecosystem.

LAUNCHPAD (IDO Incubation dApp)

Decentralized Fundraising: Our Launchpad offers a robust infrastructure for fair and decentralized fundraising on Base Network. It supports new projects and innovations by providing them with the necessary tools to conduct Initial DEX Offerings (IDOs), ensuring equitable access to capital for diverse initiatives.

www.guardiansofamazonia.org

GOA STUDIOS

Creative Hub: GOA Studios is a creative powerhouse producing games, short films, and digital content that highlight Amazonian themes and conservation messages. This hub not only raises awareness about environmental issues but also integrates an NFT marketplace, offering unique digital collectibles that support our mission.

GOA COUNCIL & DAO

Governance Model: The GOA Council & Decentralized Autonomous Organization (DAO) empowers token holders to make democratic decisions about the project's direction. The Council leads community projects with the core team's support, ensuring growth and sustainability. Transitioning to a DAO emphasizes our commitment to decentralization and community involvement, allowing stakeholders to have a real impact on the project's future.

This comprehensive suite of utilities underscores GOA's commitment to leveraging advanced blockchain technologies to support the conservation of Amazonian biodiversity while fostering innovation and community engagement within the ecosystem.

GOANFT: Preserving Amazonia, One NFT at a Time

GOA NFT MARKETPLACE & CARBON CREDITS

GOA NFT: The NFT marketplace enables the creation, buying, and selling of NFTs, providing a platform for digital art and collectibles centered around environmental conservation.

Carbon Credits: Adding Value to Every GOA Token

Guardians of Amazonia (GOA) integrates carbon credits into its ecosystem, adding real-world value to each token. Here's how:

- 1. Carbon Credits:** Every GOA token represents a measurable reduction in emissions, directly contributing to offsetting carbon footprints.
- 2. Trade & Offset:** NFTs traded on our marketplace automatically support carbon credit acquisition, reducing blockchain's environmental impact.
- 3. Real-World Use:** Businesses and individuals can invest in GOA tokens to effectively offset their environmental impact.
- 4. Eco-Projects:** Part of GOA's revenue funds environmental initiatives, driving reforestation and climate action efforts.

www.guardiansofamazonia.org

EXTRAORDINARY COLLECTION

GOANFT features a curated selection of digital art representing Amazonia's unique and endangered species of plants and animals. Each NFT highlights the beauty and rarity of its subject, adding intrinsic value and appeal.

ENGAGEMENT AND AWARENESS

By showcasing Amazonia's biodiversity through art, GOANFT raises awareness about the region's ecological importance and the threats it faces, fostering a deeper connection between the digital community and real-world conservation efforts.

SUPPORT FOR LOCAL COMMUNITIES

A significant portion (10%) of NFT sales proceeds is directed to local communities and organizations protecting Amazon's natural resources. This financial support aids conservation efforts and provides an economic incentive for their crucial work.

Key Features

- **Rarity and Character Development:** Each NFT is not only a piece of art but also an asset with developed characteristics and rarity tiers, adding a gamified element to encourage engagement and investment.
- **Community Benefits:** By allocating a portion of sales to indigenous and local communities, GOANFT ensures that those who guard the Amazon directly benefit, supporting their way of life and their role in maintaining biodiversity.
- **Market Value:** The uniqueness and limited availability of each NFT, combined with the cause they support, enhance their market value. Collectors are contributing to a vital cause, adding emotional and ethical weight to their investment
- **Digital Storytelling:** Each NFT is accompanied by a narrative that educates the buyer about the flora or fauna it represents, creating a cohesive story throughout the collection.

Long-Term Vision

- **Expansion:** Future phases may introduce interactive elements where NFT owners can participate in virtual conservation efforts or vote on project directions using their NFTs as governance tokens.
- **Partnerships:** Collaborating with environmental organizations and leveraging celebrity endorsements to raise profile and impact.
- **Technology Integration:** Exploring augmented reality (AR) to bring NFTs to life in educational settings or through mobile applications, enhancing user experience and engagement.

GREENPEACE

Note: These brands are our potential pillar partners and are not yet officially affiliated.

GOA TOKENOMICS

50% PRE-SALE 13.5 BILLION

- Ensures a stable and robust market by providing ample supply for early investors.
- Initial pre-sale price: \$0.000100
- Conducted in 8 stages for gradual distribution and price stability

20% LIQUIDITY 5.4 BILLION

- Guarantees liquidity for trading, ensuring smooth transactions.
- All liquidity will be locked in our liquidity wallet for trust and security.

7.5% STAKING 2.025 BILLION

- Incentivizes token holders to stake their GOA, providing network security and earning rewards.

7.5% TEAM AND MARKETING 2.025 BILLION

- Locked to ensure commitment and integrity from the team.
- Supports ongoing marketing efforts to promote the project and attract new users.

5% COMMUNITY REWARDS 1.35 BILLION

- Rewards community members for their support and participation in various initiatives.

10% CHARITY PROJECT FUND 2.7 BILLION

- Dedicated to Amazonian conservation efforts.
- Funds will be distributed through community voting to ensure transparency and alignment with user values.

Token Name: **GuardiansOfAmazonia**

Token Supply: **27,000,000,000**

Token Symbol: **GOA**

Chain: **Base Network**

Pre-Sale Stages

The pre-sale will be conducted in 8 stages with an initial price of \$0.000100. This staged approach ensures fair token distribution and gradual price appreciation

Stage	Price	Token	Token % from 50%	Value in USD
1	0.00010	978,750,000	7.25%	\$97,875
2	0.00022	1,181,250,000	8.75%	\$259,875
3	0.00034	1,383,750,000	10.25%	\$470,475
4	0.00046	1,586,250,000	11.75%	\$729,675
5	0.00058	1,788,750,000	13.25%	\$1,037,475
6	0.00070	1,991,250,000	14.75%	\$1,393,875
7	0.00082	2,193,750,000	16.25%	\$1,798,875
8 Final Stage	0.00094	2,396,250,000	17.75%	\$2,252,475
Total		13,500,000,000	100%	\$8,040,600

TOKEN VESTING SECURITY STRUCTURE

To ensure the security and stability of the GOA ecosystem, we are implementing a Token Vesting Security Structure. This means that after the pre-sale, all token holders can only claim an initial amount of 25% of their total token holdings. The remaining tokens will be released in stages over a period of 8 months, with claims available every 2 months.

Benefits of Token Vesting Security

Market Stability

- **Prevents Premature Token Sell-Off:** Gradual token release prevents a sudden influx of tokens into the market maintaining stability and preventing drastic price drops.
- **Investor Confidence:** Ensures that the market remains stable, building investor confidence and promoting long-term holding.

Encourages Long-Term Investment

- **Sustainable Growth:** Encourages participants to focus on the long-term prospects of the project rather than short-term gains.
- **Continuous Development:** Motivates developers to continually work on and improve the project, as they are vested in its long-term success.

Enhanced Transparency

- **Publicly Accessible Information:** All information regarding token distribution is available on the blockchain, promoting transparency and trust.
- **Trust Building:** Builds trust among the community, as they can verify the distribution and holding patterns on the blockchain.

Additional Benefits

Staking During Vesting

While tokens are held in vesting, token holders have the option to put their tokens into staking to earn additional rewards.

- **Earn While Holding:** Token holders can earn rewards through staking while waiting for the vesting schedule to complete.
- **Price Appreciation:** By reducing the number of immediately tradeable tokens, the price of GOA tokens is likely to increase due to reduced supply pressure.

Implementation Details

- **Initial Claim:** After the pre-sale, token holders can claim 25% of their total token holdings immediately.
- **Vesting Period:** The remaining 75% of tokens will be released in stages over an 8-month period.
- **Claim Schedule:** Tokens can be claimed in increments every 2 months, providing steady and predictable token releases.

CLAIM SCHEDULE

Initial Claim	(Month 0):	25%
First Release	(Month 2):	18.75%
Second Release	(Month 4):	18.75%
Third Release	(Month 6):	18.75%
Final Release.	(Month 8):	18.75%

The implementation of the Token Vesting Security Structure ensures that the GOA ecosystem remains secure and stable, promotes long-term investment, and builds trust within the community. By allowing token holders to stake their tokens during the vesting period, we provide an additional incentive to hold and support the project, ultimately contributing to the growth and success of GOA.

TOKEN BURN

Mechanism: A portion of transaction fees, NFT sales and donations will be allocated to buy back and burn GOA tokens. This approach reduces the total supply of tokens over time, which can help increase their value.

Phase 1: Foundation

- **Pre-Sale Website Launch:** Our pre-sale website goes live, inviting early investors to join the initiative.
- **Community Building:** Grow our Telegram community to 10,000 members, fostering early engagement.
- **Media & PR:** Initiate media and PR activities to raise awareness about our mission.
- **Social Channels:** Launch and establish our social media channels to connect with a broader audience.
- **Research:** Conduct thorough research to guide our next steps and ensure informed decisions.
- **Liquidity & Token Locker:** Develop and launch a secure dApp for locking liquidity on Base Network, promoting trust and stability within the ecosystem.

Phase 2: Expansion

- **First Donation:** Make the first donation to a biodiversity-related cause, showcasing our commitment.
- **Community Expansion:** Grow our community to 30,000 supporters, amplifying our reach.
- **Ambassador Campaign:** Launch an ambassador campaign to spread our mission and engage influencers.
- **Full Website Launch:** Unveil our comprehensive website to provide detailed information and resources.
- **Exchange Listings:** Launch on decentralized and centralized exchanges (DEX/CEX) to increase accessibility.
- **Airdrop:** Conduct an airdrop to reward early supporters and encourage further engagement.
- **MultiSender dApp:** Enable users to distribute tokens to multiple wallets in a single transaction, simplifying airdrops and promotions.

Phase 3: Restoration

Introduce our NFTs and deepen our support for biodiversity initiatives.

- **NFT Introduction:** Release biodiversity-themed NFTs to raise awareness and funds for conservation.
- **Second Donation:** Make a second donation to a biodiversity-related cause, reinforcing our impact.
- **Community Growth:** Reach 60,000 GOA holders, expanding our influence and support base.
- **Partnerships:** Announce strategic partnerships to enhance our resources and capabilities.
- **Exchange Expansion:** Conduct a second launch on DEX/CEX to further increase liquidity and trading opportunities.
- **Additional Airdrop:** Distribute another airdrop of GOA tokens to reward continued community support.
- **GOASwap Launch:** Launch our cutting-edge DEX aggregator in partnership with Sushi.com's V2 Protocol.
- **Contract Deployer:** Simplify launching projects on Sushi's LP pools with seamless integration into GOASwap.

Phase 4: Sustainability

Introduce our NFTs and deepen our support for biodiversity initiatives.

- **GOA Studios:** Launch GOA Studios to produce environmental content, games, and short films, promoting conservation.
- **NFT Marketplace:** Launch our NFT marketplace to provide a platform for buying and selling conservation-themed NFTs.
- **Climate Change Initiative** Start initiatives focusing on flora and fauna to combat climate change.
- **Volunteer Recruitment:** Recruit 50,000 GOA volunteers to actively participate in conservation efforts.
- **Community Expansion:** Grow to 200,000+ GOA holders, solidifying our community base.
- **New Partnerships:** Announce additional strategic partnerships to further our mission.
- **Staking:** Enable staking for GOA tokens, providing holders with additional incentives and rewards.

Phase 5: Education

Launch our educational initiatives and expand our global impact.

- **GOA Academy:** Launch the GOA Academy, featuring AI tools for learning about conservation and blockchain technology.
- **GOA Gaming:** Introduce Play-to-Earn games with environmental themes, combining education and entertainment.
- **Metaverse Zoo:** Launch a virtual zoo on the Metaverse to educate users about Amazonian wildlife and conservation efforts.
- **Charity Allocation:** Allocate 5% of tokens to charitable causes, ensuring continuous support for conservation projects.
- **Community Growth:** Expand to 500,000+ GOA holders, becoming a major force in conservation and blockchain communities.
- **Volunteer Expansion:** Recruit 100,000+ GOA volunteers, enhancing our capacity for on-the-ground conservation work.
- **Market Cap Achievement:** Aim for a 1B+ market cap, reflecting our growth and impact.
- **GOA Protocol:** Introduce the GOA Protocol to enhance our ecosystem, ensuring efficiency and sustainability.
- **Launchpad (IDO Incubation dApp):** Provide infrastructure for fair and decentralized fundraising on Base Network, supporting new projects.
- **GOA Council & DAO:** Implement a governance model where token holders make decisions democratically, transitioning to a DAO for enhanced decentralization and community involvement.

OUR TEAM

HARPY HAWK EYE

Lead Developer

Harpy is our meme-tastic founder and a true connoisseur of code who swapped the concrete jungle for the heart of the rainforest. With a strong Wi-Fi signal and an even stronger love for nature, she comfortably crafts complex algorithms while identifying the calls of rare birds.

JAGUAR GENIUS

Head of Biodiversity Initiatives

Jaguar is an architech and tech enthusiast who co-founded GOA. Her goal is to transform our interaction with biodiversity and safeguard our planet's precious flora and fauna.

TOUCAN TECHSAVVY

Chief Conservation Officer

A passionate co-founder who seamlessly blends tech innovation with conservation efforts, ensuring that every digital step forward helps protect Amazon's diverse ecosystem.

SLOTH SAVANT

Senior Software Engineer

The tech warrior who traded office desks for forest dens. Living harmoniously with nature, Sloth is the coding champion behind GOA, turning the whispers of the wilderness into digital marvels.

DOLPHIN DATA MASTER

Blockchain Specialist

Dolphin is the blockchain genius who ensures our decentralized solutions are as robust and resilient as the Amazon itself, bridging the gap between cutting-edge technology and environmental preservation.

MACAW CODE CREW

Development Team

Macaws are highly intelligent and social birds, embodying the collaborative and innovative spirit of our development team, who work together to turn the whispers of the wilderness into digital advancements.

MECHANICS OF GOA DAO

What DAO means?

1. Membership

Eligibility: Anyone holding GOA tokens is a member.

Token Acquisition: Tokens can be acquired through participation in the GOA DAO ecosystem or via exchanges.

2. Governance

Proposals: Any member can submit a proposal for consideration. Proposals can range from project funding requests to changes in governance structure.

3. Voting

Token-Based Voting: Each GOA token represents one vote. Members vote on proposals using their tokens.

Voting Period: Each proposal has a defined voting period, typically 7 days.

Quorum and Approval: A minimum quorum must be met for a proposal to pass, and a majority approval is required.

4. Treasury Management

- **Decentralized Control:** The DAO's treasury is managed through community votes. Funds are allocated to projects and initiatives based on member-approved proposals.
- **Transparency:** All transactions and allocations are recorded on the blockchain, ensuring complete transparency.

5. Staking and Rewards

- **Staking:** Members can stake their GOA tokens to participate in governance and earn rewards.
- **Rewards:** Stakers receive rewards from the DAO's revenue streams, which can include transaction fees, project profits, and other income sources.
- **Distribution:** Rewards are distributed proportionally based on the number of tokens staked and the duration of the stake.

6. Smart Contracts

- **Trustless Execution:** All operations, including voting, treasury management, and reward distribution, are executed via smart contracts.
- **Security:** Smart contracts are audited regularly to ensure security and reliability.

6. Transparency and Accountability

- **Open Source:** GOA DAO's codebase is open source, allowing for community review and contributions.
- **Audits:** Regular audits are conducted to maintain the integrity of the DAO's operations.
- **Real-Time Monitoring:** Members can monitor the performance of the DAO, including trading bots and other initiatives, via the dashboard.

7. Community Engagement

- **Forums and Discussions:** Members are encouraged to participate in forums and discussions to share ideas and feedback.
- **Collaborations:** GOA DAO partners with other projects and organizations to enhance its ecosystem and provide additional benefits to members.
